

Corepoint Health's Corepoint Integration Engine Receives ONC-ACB Stage 2 Certification by Drummond Group

March 18, 2013—Frisco, Texas – Corepoint Integration Engine has been tested and certified under the Drummond Group's Electronic Health Records Office of the National Coordinator Authorized Certification Body (ONC-ACB) program. [Corepoint Integration Engine](#) is compliant in accordance with the criteria adopted by the Secretary of the U.S. Department of Health and Human Services.

“Corepoint Integration Engine provides an intuitive [interoperability platform](#) for exchanging patient data with various EHRs and HIEs,” said Phil Guy, Corepoint Health CEO. “This certification gives our customers confidence that their [health information exchange](#) initiatives – both internal and outside the four walls of their organization – are supported by an industry-leading integration engine that has successfully passed the defined criteria, an essential element to achieve Meaningful Use and qualify for incentive funds under ARRA.”

Drummond Group's ONC-ACB certification program certifies that EHRs, and software that interacts with EHRs, meet the Meaningful Use criteria for either eligible provider or hospital technology. In turn, healthcare providers using the products of certified vendors are qualified to receive federal stimulus monies upon demonstrating meaningful use of the technology – a key component of the federal government's push to improve clinical care delivery through the adoption and effective use of EHRs by U.S. healthcare providers.

Corepoint Integration Engine met the 2014 requirements for Modular Ambulatory EHR and Modular Inpatient EHR certification.

“Leveraging information technology for healthcare initiatives provides the opportunity to deliver a high-level quality of care and efficiency which essentially benefits and enhances the overall patient experience,” says Rik Drummond, CEO of the Drummond Group Inc. “We have been testing software for more than a decade and will continue to provide our extensive experience testing and certifying complex systems for multiple industries, as well as ensuring interoperability and security remain key components in the growing healthcare industry.”

Corepoint Integration Engine was the first interface engine to receive Stage 1 Modular Ambulatory EHR and Modular Inpatient EHR certification and continues to lead in delivering interoperability confidence for the healthcare market.

This Modular Ambulatory EHR and Modular Inpatient EHR certification is 2014 compliant and has been certified by an ONC-ACB in accordance with the applicable certification criteria adopted by the Secretary of the U.S. Department of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee

the receipt of incentive payments. Corepoint Health, March 13, 2013, Corepoint Integration Engine v5.0, Modular Ambulatory EHR certification ID #03132013-1786-6, Modular Inpatient EHR certification ID # 03132013-1785-6, no Clinical Quality Measures were tested, no additional software required, modules tested and certified include 170.314(d)(1, 5, 6, 8); 170.314(f)(2, 3, 4); 170.314(g)(4). This certified product-version may require one-time costs to establish interfaces for reporting to immunization registries, public health agencies, and transmission of reportable laboratory tests (170.314.f.2, 170.314.f3, 170.314.f4).

About Corepoint Health:

Corepoint Health has the healthcare IT experience and strength to deliver a dramatically simplified approach to internal and external data integration and health information exchange for hospitals, radiology centers, laboratories, and clinics. Our next generation software solutions are transformational and will streamline your IT environment, provide a fast track to achieving your interoperability goals, and create operational leverage within your organization. Corepoint Health’s solutions achieve a needed balance of being both intuitive and sophisticated while delivering solid functionality and performance. Our approach significantly reduces the demands on your IT staff and budget.
