

Corepoint Health Achieves ONC-ATCB Modular EHR Certification by Drummond Group

Corepoint Integration Engine continues to lead the industry as the first [interface engine](#) certified for Modular Ambulatory EHR and Modular Inpatient EHR

Frisco, Texas – May 4, 2011 – Corepoint Health, a leader in healthcare integration software, has announced that Corepoint Integration Engine has received Modular Ambulatory EHR and Modular Inpatient EHR certification. Tested and certified by Drummond Group under the Electronic Health Records Office of the National Coordinator Authorized Testing and Certification Body (ONC-ATCB) program, the integration engine software is 2011/2012 compliant in accordance with the criteria adopted by the Secretary of Health and Human Services.

“Meaningful Use and EHR adoption are transforming health care and driving several significant health IT projects. In the middle of this is having the capability to exchange patient data in an effective, efficient, and secure manner,” said Phil Guy, CEO, Corepoint Health. “This certification enables our customers to be confident that their healthcare data exchange initiatives are supported by an [integration engine](#) which has successfully passed the defined criteria, an essential element to achieve Meaningful Use and qualify for incentive funds under ARRA.”

Guy continued, “Corepoint Integration Engine continues to lead the way in delivering an approach which simplifies the complexities of [healthcare integration](#) while providing technology which can robustly meet the increased demands of this new era of interoperability.”

Drummond Group’s ONC-ATCB 2011/2012 certification program tests and certifies that EHRs, and software that interacts with EHRs, meet the Meaningful Use criteria for either eligible provider or hospital technology. In turn, healthcare providers using the EHR systems of certified vendors are qualified to receive federal stimulus monies upon demonstrating Meaningful Use of the technology – a key component of the federal government’s push to improve clinical care delivery through the adoption and effective use of electronic health records by U.S. healthcare providers.

Corepoint Integration Engine was also recently recognized as being [number one in the Interface Engines](#) market segment of the 2009 & 2010 *Top 20 Best in KLAS Awards: Software & Professional Services* report (©2011 KLAS Enterprises, LLC. All rights reserved. www.KLASresearch.com).

“The need to leverage information technology in the healthcare industry is huge – as the quality of care and efficiency benefits that come with computerization can really make a difference in the overall patient experience. We’re ready to help transform the industry by providing the sophisticated software testing services that ensure that vendors and hospitals are offering systems that are capable of meeting the Meaningful Use standards required to obtain incentive funds as well as the rich functionality required to move the clinical care needle forward,” says Rik Drummond, CEO of the Drummond Group. “We have been testing software for more than a decade and are ready to leverage our extensive experience handling sophisticated systems in complex industries as well as dealing with complicated technical issues such as interoperability and security.”

This Modular Ambulatory EHR certification and Modular Inpatient EHR certification is 2011/2012 compliant and has been certified by an ONC-ATCB in accordance with the applicable certification criteria adopted by the Secretary of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services or guarantee the receipt of incentive payments. Corepoint Health, April 28, 2011, Corepoint Integration Engine v4.2.4, Certification ID #04282011-1160-8 for Modular Ambulatory EHR and #04282011-1161-8 for Modular Inpatient EHR, no Clinical Quality Measures were tested, additional software includes Windows Server OS, modules certified include 170.302 O-Q, S-V, 170.304 F, I, 170.306 D, E, F.

About Drummond Group

Drummond Group Inc., the trusted software test lab, provides effective and efficient electronic health record (EHR) testing to healthcare information technology vendors and hospitals. As an Office of the National Coordinator Authorized Testing and Certification Body (ONC-ATCB), Drummond Group works closely with healthcare software vendors and hospitals to certify EHRs that are looking to qualify for incentive funds under the American Recovery and Reinvestment Act (ARRA). Drummond Group is approved to certify both complete and modular EHR for both ambulatory and inpatient. Leveraging more than a decade's worth of interoperability, conformance testing and certification experience in multiple industries, Drummond Group delivers what's needed in healthcare: highly reliable and readily affordable software testing services.
